

Switch cabinet module PT-6

- **Art.-No.: 490-00101**
- **Connecting link between programmer PT-100-N / PC and encoder**
- **For locking in on mounting rail NS 35/7,5 according to DIN EN 50 022 or as well for screwing on**

Description

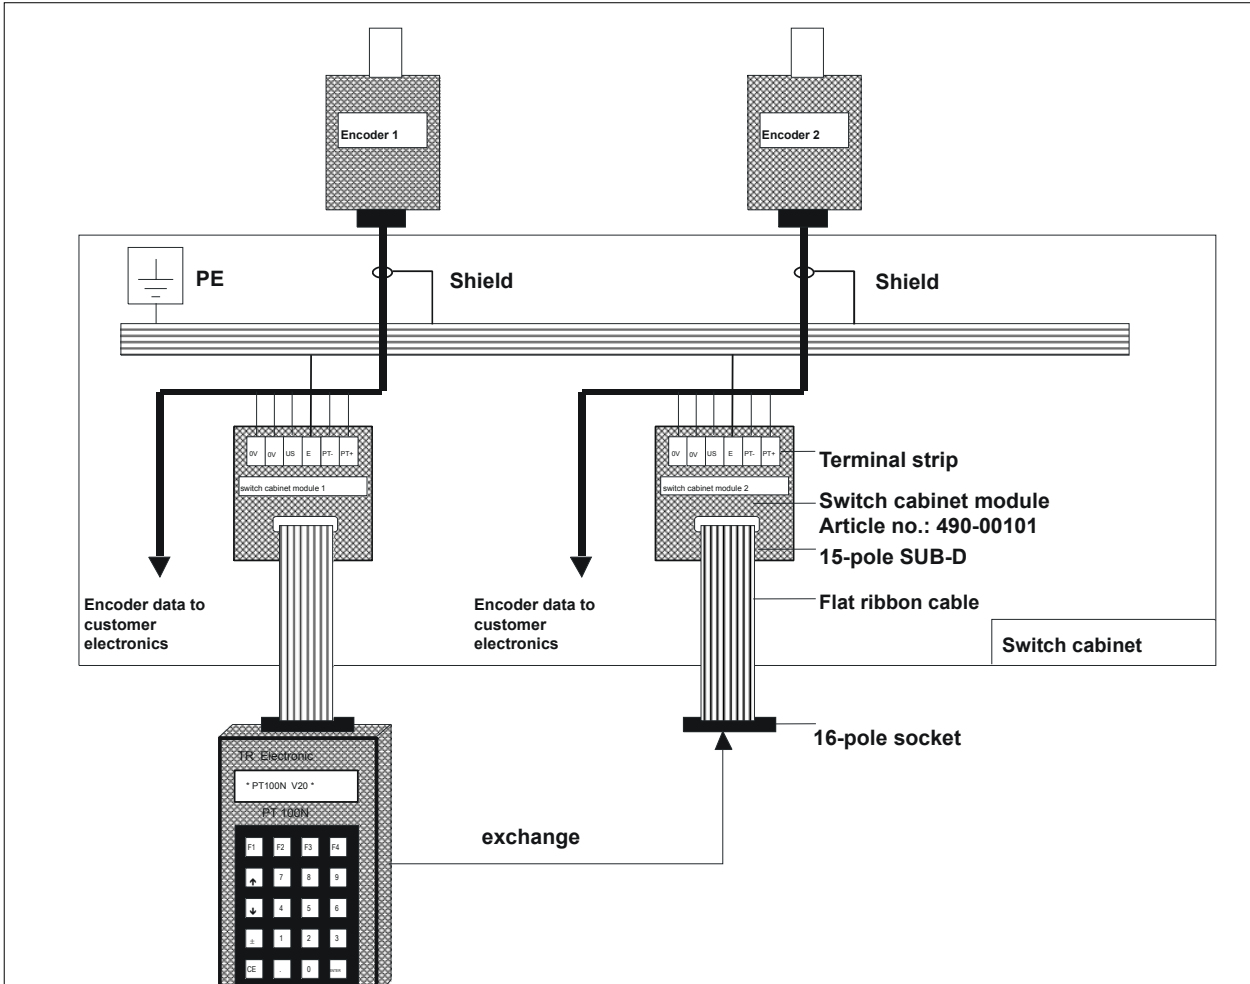

The switch cabinet module represents the connecting link between the programmer PT-100-N and the encoder or linear encoder.

The programmer is linked with the SUB-D-socket of the switch cabinet module. A 6-pole terminal strip on the switch cabinet module ties it to the measuring system. Consequently, the measuring system can be programmed without problems from the switch cabinet.
