

SAFETY SPEED MONITORING MODULES MOSAIC MV0/MV1/MV2

The Mosaic MV0/MV1/MV2 expansion modules allow the monitoring (PLe) of:

- * Zero speed
- * Max speed
- * Speed range
- * Motion direction; rotation / translation.

The modules allow to configure up to 4 speed thresholds for each logic output (axis).

Each module integrates two logic outputs configurable via the MSD and is therefore capable to control up to two independent axes.

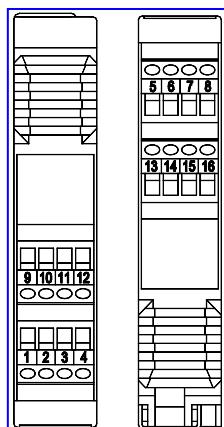

- * RJ45 for encoder connections (1 of MV1, MV2 of 2) and terminal blocks for connection of proximity (up to 2 proximity switches per module).
- * Inputs frequency: Encoder up to 500 KHz (300 KHz for HTL);
Proximity up to 5 KHz.
